

VENATOR™

Every Venator is guaranteed to shoot .5MOA. Period.

Accurate, Reliable, and Lightweight have long been thought to be the unachievable “Holy Grail” of the precision AR platform...until now.

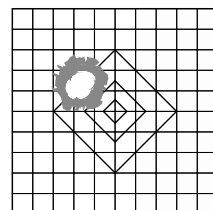

Not only does our Venator hold these attributes, but it is also backed with a Limited Lifetime Warranty and a .5MOA Accuracy Guarantee.

Offered in multiple chamberings, our Venator AR10 is the perfect choice for Tactical Operations, Big Game Hunters, and Precision Rifle competitors. The 7075 Billet matched receiver set provides the foundation, along with our proprietary hand assembly process. The Venator can be tuned using the adjustable gas key built into the BCG, making it suppressor ready and features premium parts throughout, including a PROOF Research™ Carbon Fiber Barrel and TriggerTech Drop-in trigger system.
