

MISSION READY

READY SERIES

ARE YOU MISSION READY?

Regardless of the task at hand, the Mission Ready ensures your success. Available with standard or fully ambidextrous controls, the Mission Ready allows the operator to manipulate the weapon in any scenario. Tailor the rifle to your mission set with your choice of either the TSR-1x Red Dot, or the TS-6X SFP. Featuring a 9.85" barrel, 11.5" LVDA® rail, Top Hat™ muzzle device, Blast Shield, and ELG fire control group. Mission Ready components are manufactured, mounted, bore-sighted, and tested before leaving the factory. Available to Law Enforcement and Military as a Machine Gun, and to the general public as an SBR where NFA and state regulations allow.

STARTING AT \$1499
