

RANGE READY

ARE YOU RANGE READY?

Ensure that you are prepared for your next, or your first, visit to the range with the Range Ready. Available with standard or fully ambidextrous controls, left or right-handed shooters can more easily control the weapon. Under the 16" LVDA rail lies a 14.58" barrel pinned and welded to our Top Hat muzzle device with proprietary blast shield. The shooter can choose either the US Optics TS-8x with Rapid Ballistic Reticle or TSR-1X Red Dot. This package enables the shooter to successfully engage targets out to 800m out of the case. The Range Ready comes factory mounted and bore-sighted.

STARTING AT \$1499
