

## MARKING VARIANCE PROGRAM

1. This document will explain the process of purchasing variance lowers from ZRODelta and gather the necessary information to ensure your needs are met accurately and efficiently.
2. A Type 07 (Manufacturer of Firearms) FFL is required to participate in this program.
3. The first step is to complete and submit the marking variance application and your design via <https://zrodelta.com/markings-variance> This will generate the forms needed to submit your application to the ATF Marking Variance Dept. This process may take up to 90 days; however, we are seeing about 20 days from submission to completion.
4. Other documents, such as tax exemption, logos, previous variance designs, desired layouts
5. This process will generate two accounts. One as wholesale/variance so you can re-order and pay directly from the website. The other will be to [www.unbrandedar.com](http://www.unbrandedar.com) so that you can access our vast array of small parts for your build or to sell in your shop. A sales tax exemption and business license is required to access wholesale pricing.
6. After ATF Approval our accounting office will reach out for payment. Upon payment confirmation, proof of your design will be complete per your input and emailed to you for approval. Progressing time does not begin until payment is received in full and proof is approved via email
7. There is a minimum order of 10 Lowers. We offer both ambidextrous and standard lower receivers. Types can be mixed and matched to achieve QTY minimum thresholds.
